## Taxi game 2 unblocked

Are you ready to go out there and start making a living now? If so, then let us present you with one of the oldest and noblest professions in the field of services; Taxi driving. However, this job is not walking in the park as you are about to find out! Sim Taxi is a fun online driving simulation game where you have the unique opportunity to experience the difficult environment and play the role of a yellow taxi driver in a big city like New York. Your job is to pick up pedestrians as passengers and bring them safely and gladly to their desired destinations quickly in order to earn the highest possible fare. Contracted to a busy taxi business, you can choose to wait for fares to come in through the operator, or to cruise diligently on the streets looking for new customers who need a ride. With real-life multitasking challenges such as avoiding mid-road traffic collisions, keeping your car powered-up, and changing the radio station in response to your customers' requests, this is an authentic and stimulating activity-based skill to keep your mind at the wheel at all times. Good keyboard control and smart observation skills are undoubtedly important, such as your sense of direction. Taxi drivers are respected for their insider knowledge of their city areas, and your discerning customers expect a high level of professionalism in your driving. It's time to leave your coffee, and get tied up and do the job. Drive safely, and good luck with your new virtual money earning business! How to play: There are three different game modes to choose from: New Game (Standard), Practice Mode, and Time Attack. By clicking on 'New Game' on the main menu screen, enter a standard game where your goal is to earn virtual income by collecting and taking off passengers. In practice mode, you simply have the opportunity to practice driving, while time attack features timed missions where you have a set time limit for each fare. In each of the game's modes, the controls for driving remain the same: Up arrow = Acceleration; Down Arrow = Brake & Reverse; Left & Right Arrows = Steer. The gameplay features a useful 'general' view, so you should always have a good sense of where you're going. In New Game mode, you should drive around the city, pick up passengers on your own initiative, or by address through your taxi company. As you drive past pedestrians, a green circle forms around them if you suddenly need a taxi. Carefully park your taxi by the sidewalk to to the pedestrian to get in your cab. The new customer now tells you where to go, and the direction to this destination is indicated by the compass in the upper left corner of the game screen. Follow this compass until you reach the customer's desired destination (indicated by a circle of green arrows). Just stop the car near these green arrows in order to leave your customer out, and collect the fare. The sooner you complete the journey, the more virtual profits you make Track your fuel level in the lower left corner of the game area. If this is almost empty, visit a gas station to fill the tank. If you collide with other vehicles, the damage line decreases (this line is key-shaped and indicated in the lower-right corner of the play zone). If your The damage bar becomes completely red, your taxi explodes spectacularly (not good!). Try not to collide with any police cars as this leads to a hefty \$100 penalty. Sometimes, your customer complains about the radio station in your taxi. You can change the station by pressing the number 1, 2 and 3 keys on your keyboard. If you want to upgrade your taxi, drive back to the taxi booth (also called a taxi rank), and press the Spacebar when you are at your designated location to access the upgrade store. Enjoy your new important role in the community! If this Flash-based game no longer works in IE11 or Chrome browser on your PC/MAC, try playing firefox browser with Adobe Flash player installed. [Total: 14 Average: 4.5/5] Click here If the game is not loaded or you do not see a game on the screen. In the game Ace Gangster Taxi, you need to take a car and go for the car. Complete these tasks and reach the destination point. Earn money, upgrade the car and avoid dealing with the police. I don't know.
